Lallemand Ethanol Technology welcomes new Regional Sales Managers.

Lallemand Ethanol Technology would like to announce the hiring of two new regional sales managers within our team.

Carl Gandolfo - Eastern Regional Sales Manager

Carl comes to Lallemand Ethanol Technology with over 30 years sales experience both in the Automotive Aftermarket and the Security Industry. For the last 13 years, Carl has been the National Sales Manager for Code Blue Corporation and ICOP Digital, Inc.

Educated at St. Louis University and Tarkio College, Carl has a Bachelor of Arts in Criminal Justice Administration and spent 10 years as a St. Louis County police officer prior to entering sales.

Carl has three honorable discharges, two from the US Navy and one from the US Air Force and is a Vietnam era veteran.

Craig Ammann - Western Regional Sales Manager

Craig comes to Lallemand Ethanol Technology with over 15 years of sales and marketing experience. He was most recently with a major biofuels project management and engineering company emphasizing the development of cellulose ethanol production and optimization of existing ethanol production facilities.

Prior to that, his previous experience has been in the communications industry developing new marketing strategies such as product positioning, and company brand/identity.

Craig served nine years in the United States Army and South Dakota Army National Guard in the Transportation Corps. Craig proudly served in support of Operation Desert Shield and Desert Storm as member of the executive logistics team.

Craig has a Bachelor of Science Degree from South Dakota State University.

For more information, please contact Craig Pilgrim at (815) 986-8443 or cpilgrim@lallemand.com.

Lallemand Ethanol Technology is a Milwaukee, WI based, leading supplier of fermentation ingredients (yeast, yeast nutrition and antimicrobials) and value-creating services to the fuel ethanol industry. Lallemand Ethanol Technology is a business unit of Lallemand Inc., the Canadian-based yeast and bacteria producer.
